LEANDER D. WARREN, Treasurer.

HENRY H. HOLT,  
BENJ. T. WASHBURN, } Selectmen  
GEORGE S. MAYO, } of  
Lyme.

We certify that we have examined the accounts of the Selectmen, Overseer of the Poor and Treasurer of the town of Lyme, and find the same correctly cast and properly vouched.

FRANCIS W. BAKER, } Auditors.  
JOHN N. HOLT,

Lyme, N. H., March 2d, 1885.

# REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE.

The small space allotted the school committee in the annual report of the town will not permit him to make any extended remarks upon the condition of the schools in town, so he will briefly call attention to some of the most important matters.

In speaking of the schools as a whole, it is safe to assert that they are fully up to the average good standard of country schools in New Hampshire. To keep them so, like all other good institutions, its friends must be vigilant in guarding, sustaining and elevating the same.

My predecessors have made vigorous efforts to deeply impress upon the minds of pupils, teachers and friends of education, the importance, yes, the necessity of punctual and constant attendance at school the whole of each term, and judging from the long list of names on the "Roll of Honor" we may infer they have made some progress in that direction; yet, we see by examining the school Registers that we must continue to be watchful till a more perfect standard is reached. The "Roll of Honor" this year will compare favorably with former years; yet I have decided not to publish the names in this report for the reason that all the names are not obtained by the same rule.

I learn that some teachers call the roll and mark absences immediately on calling the school to order each half day, as they should according to law. Others allow five minutes more or less for tardy ones to get in; still others wait till after devotional exercises before calling.

Other errors also have been noticed by the committee. The keeping of this "Roll of Honor" must be uniform and observed strictly by teachers.

The most of the school houses are well located and are good, commodious buildings for school purposes. The structure they call school house in district number six is hardly deserving the name, yet it has borne that appellation quite too many years. The people there know what they need and will doubtless soon act upon such knowledge.

The studies pursued the past year, have been about the same as in previous years, and it is hoped with equally good results.

In compliance with the law recently passed by our state legislature, making the study of Physiology and Hygiene, with special reference to the effects of alcoholic drinks, stimulants and narcotics upon the human system, compulsory in the district schools of New Hampshire, your committee has, with the advice of citizens and physicians in town, decided in favor of Smith's Elementary Physiology and Hygiene, which he has been introducing into the schools the past winter.

It should not be necessary to have to call attention of teachers and prudential committees to the filling out of the school Register according to law and in such a manner that the town committee can make out a legal report to the State Superintendent. More than four fifths of them are so incomplete it is impossible to obtain correct statistics.

There can be no valid excuse for such negligence. Teachers, with a little help from prudential committees, can easily obtain all necessary statistics. They make objections to the Registers(which I admit are pertinent) saying, they are too complicated, too many unnecessary questions for a country school Register, but this will not excuse them for neglecting to fill all blanks needed for the town committees report.

It is not advisable, perhaps, to single out teachers, by name in connection with each school in this report, but will say we have had some excellent teachers, well

qualified for their vocation, also a few young and inexperienced, who have made their first effort at teaching this season and may develop into successful educators. There is still another class, who desire to teach, want to do something for themselves and would like to be successful; but evidently lack some of those high moral, mental, physical or social qualifications necessary to success.

District No. 1, had one school of eight weeks in summer, and two in winter of fourteen weeks each. These schools need very efficient teachers—secure them when you can. You have been very successful the past winter. A united district and well qualified teachers will generally insure success.

District No. 2, takes a lively interest in its schools of late, and intends to have the best available teachers; consequently have good schools.

In district No. 3, I have observed, at least, three good things, the past year, viz., a good school house, a good teacher and good scholars, also good results by the combination,

District No. 4, generally secures good teachers, and when they give them a hearty support a profitable school is the result Good progress has been made the past year.

District No. 6 was quite successful in the selection of teachers, and good progress was made in the various branches pursued. Better results even, might be obtained if parents heartily and cordially cooperate with teachers.

No. 7 has had twenty weeks school. The first term was not a success. A good teacher the second term. Some pupils learned well, others failed to do their duty as scholars.

District No. 8 had two terms of twelve weeks each, taught by the same teacher, which is virtually saying satisfaction is given. It is to be hoped that is the verdict of those most interested.

The good people of No. 9 have husbanded their resources well by having two successful terms, one of ten, the other of twelve weeks; and furnished good material for the same within the limits of their own school district. It is good to see all working so harmoniously in this district.

District No. 10 had seventeen weeks of school the past year, taught by a teacher of large experience, possessing many superior qualifications, derived from the drill and discipline of the Normal School. Success followed.

No. 11, has had two good schools the past season. Fine improvement was made.

The school in District No. 12, like all village schools, is difficult to manage, and requires teachers of higher and more varied qualifications than most other schools. We aim to secure such. If we fail occasionally, we look out sharper next time. There have been two terms of ten weeks each, the winter term having the largest number of pupils of any school in town, and was conducted by an expert, a teacher of much experience and such qualifications as are obtained at the Normal schools. Appreciation of such teachers is here shown by scholars and parents putting their hands into their pockets to prolong the school after the public money is expended. All say well done.

District No. 13 has had three terms of school, about twenty-seven weeks in all, taught by three different persons. While it is believed that all three were willing, conscientious and devoted teachers, it is claimed that best results were obtained during the winter term.

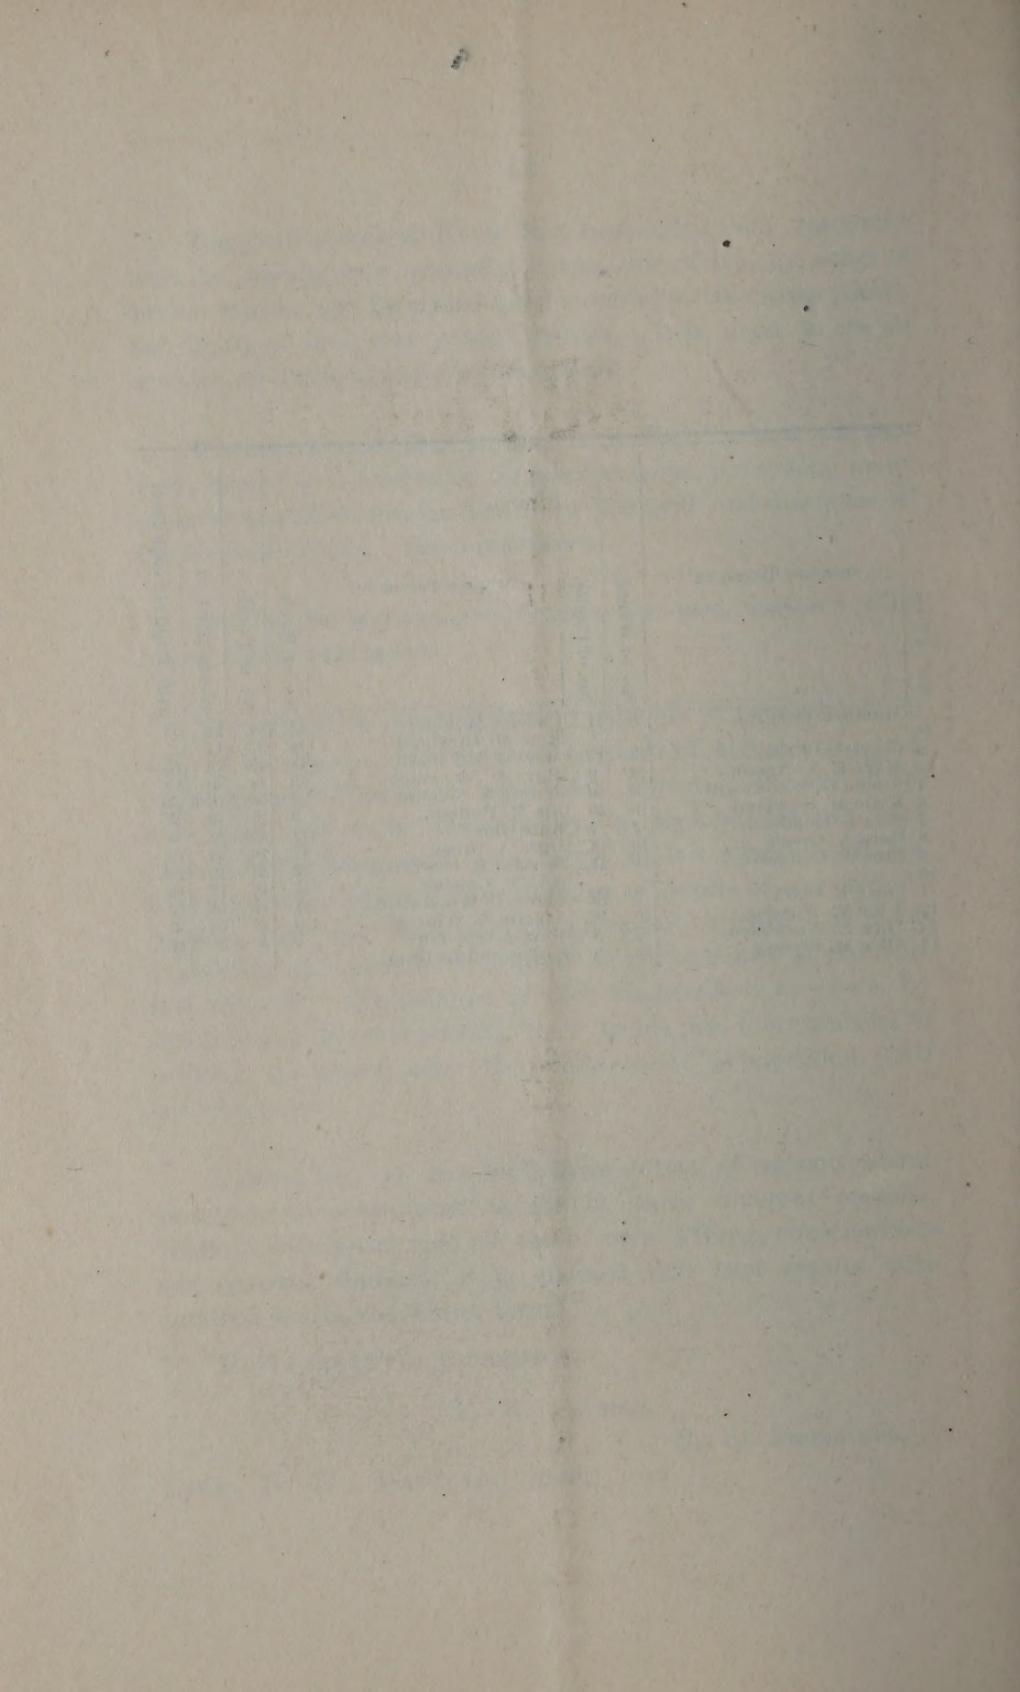

Most respectfully submitted,

F. B. PALMER,

S. S. Committee.

Lyme, N. H., March 1st, 1885.
